

Project Engineer – Mechanical Engineering (M/F/D)

Responsibilities:

- Mechanical and control engineering design of special-purpose machines for bulk materials in accordance with machinery directives (e.g., Directive 2006/42/EC)
- Confident use of one or more 3D CAD systems (e.g., Autodesk Inventor)
- Experience with pneumatic and hydraulic circuits and components as well as their installation (creation of pneumatic diagrams)
- Preparation of specifications for subsystems and support in their procurement
- Technical supervision and coordination of suppliers and external engineering partners
- Close collaboration with customers, sales, and production departments
- Generation of relevant documentation (e.g., drawings, parts lists, data sheets)

Requirements:

- Diplom-Ingenieur, Bachelor, Master oder staatlich geprüfter Techniker der Fachrichtung Maschinenbau oder vergleichbarer Fachrichtung bzw. Qualifikationen
- Mindestens 5-10 Jahre Berufserfahrung in der Konstruktion von Sondermaschinen
- Gute Team- und Kommunikationsfähigkeit
- Deutsche & Englisch Sprachkenntnisse C1
- Führerschein Klasse B
- Flexibilität, Leistungsbereitschaft und Engagement runden Ihr Profil an

Please send your application directly to the HR department. Good luck!
