

About Us

Since 1740, UCON has continuously evolved into a global manufacturer of standardized and customized IBCs and IBC systems. As a solution provider, our goal is to support our customers in creating sustainable value by solving their critical process problems.

We provide support along the entire value chain when it comes to handling liquids and powders and especially hazardous substances. From concept to implementation, we rely on our team's technical excellence and effective project management to develop tailor-made solutions.

Thanks to our in-house production capabilities, we can guarantee the highest quality standards and respond flexibly to your specific requirements. Our service doesn't end with product delivery – our dedicated after-sales team ensures your IBC systems continue to meet expectations and add value to your business.
